International Direct Distance Dialing (IDDD) is the fastest, easiest, most direct way to reach these 70 countries. Here's how easy it is to place a call.

## station-to-station calls

Dial:

- the international access code (011)
- the country code (the two or three-digit numbers above)
- the city routing code (a one to four-digit number)
- the local telephone number (a two to nine-digit number)

For example, to place a typical station-to-station call to a telephone number in Sydney, Australia, you would dial:

011 (international access code) + 61 (country code) + 2 (city routing code) + (local number).

In addition to calling station-to-station, if your telephone exchange is listed above, you can also place...

## operator-assisted calls

- 01
- the country code
- the city routing code
- the local telephone number

An operator will answer to help complete your call.

For example, to place a person-to-person call to London, United Kingdom, you would dial:

01 (operator-assisted international access code) + 44 (country code) + 1 (city routing code) + (local number); an operator would then answer to help you complete the person-to-person call.

Please allow at least 30 seconds for all foreign calls to go through.
